

THIRD FORTNIGHTLY CROP
REPORT—ISSUED BY DE-
PARTMENT OF AGRICUL-
TURE, GOVERNMENT OF AL-
BERTA, EDMONTON, JUNE 8,
1929

Crop conditions throughout the greater part of the province are very satisfactory and grain is making splendid growth, according to telegraphic reports received by the Department of Agriculture on Friday for the third fortnightly crop report for the season. Moisture requirements for some weeks have been supplied by the heavy rains which visited the southern section of the province over last week-end, and all crops are growing rapidly.

Prospects in the Peace River district are very promising and any inclement weather of drought has been removed by frequent rains during the past three weeks. Crops growing on land newly broken last season are looking exceptionally well.

In the Edmonton district and for some distance south and east the continued absence of precipitation is beginning to cause some concern, although in very few localities has the drought as yet seriously reduced the prospects of a crop. In some limited areas high winds have caused damage from soil drifting, but this is by no means general. Breaking on new land has been retarded to some extent in this section of the province by the absence of moisture in the soil, while in the south a larger acreage than usual is being broken in readiness for next season's crop.

Early sown wheat in most localities is now covering the ground, and an exceptionally good stand of fall wheat is reported from many districts in the south. Alfalfa and sweet clover are making a vigorous growth, and prospects of an increased tonnage of sugar beets are excellent. Livestock generally is in good condition and in a number of districts increased numbers of farmers are making a start with a small flock of sheep.

WE GET ALONG WITH ONE

"I have a Corot, a Rubens, and a Rembrandt."
"Do you really need more than two cars?"—Christian Science Monitor.

A cow, it is estimated, moves her jaws 41,000 times each day. It might be added that the cow has something to show for it at the end of the day.

TAX SALE OF LAND

PUBLIC SALE OF LAND UNDER
THE TAX RECOVERY ACT,
1929, MUNICIPAL DISTRICT OF
ARGYLE, NO. 99.

Notice is hereby given that, under the provisions of the tax recovery act, 1929, and amendments thereto, the Municipal District of Argyle No. 99 will offer for sale, by public auction, at the municipal office, Gratum, Alberta, on Thursday the 27th day of June, 1929, at the hour of two thirty o'clock p. m. the following land:

All West of the Old Man River, in legal subdivisions even (7) of the S. E. quarter of section fifteen, in township ten, range twenty-five, west of 4th meridian, containing twelve acres more or less, and all West of the Old Man River, in legal subdivision nine and ten, of the South-half of the N. E. quarter in section fifteen, in township ten, range twenty-five, west of 4th meridian, containing fifty-five acres, more or less.

The above land will be offered for sale, subject to a reserve bid, and the reservations contained in the existing certificate of title, and reserving thereout all mines and minerals.

Redemption may be effected before the sale by paying all arrears of taxes and costs.

Dated at the town of Gratum, Alberta, this 4th day of May, 1929.

JAMES BLAIR,
Secretary-Treasurer, of the M. D. of
Argyle No. 99.

SASKATCHEWAN ELECTIONS
RESULT IN TIE

Regina, June 7.—At three o'clock Friday afternoon it looked very much as if there would be 25 Liberals, 26 Conservatives, five Independents and four Progressives in the next Saskatchewan legislature as a result of Thursday's general elections.

There are two deferred elections. In a late session of the Legislature, which ordinarily return Liberal supporters, and on these may depend which of the major parties has the larger group in the house.

There are four seats in doubt, these being Happyland, Maple Creek, Morse and Willowbunch. The Liberals are claiming Maple Creek, Happyland and Willowbunch, while the lead of R. P. Endos, Conservative, over the Liberal in Morse is dwindling as late returns come in and the Liberals are claiming the seat. If they win all four of these seats the standing will be 27 Liberals to 25 Conservatives.

Regina, June 8.—Following are the votes in the three seats which have been considered doubtful: Happyland—Straith, Liberal, 2,378; Ducie, Ind., 2,318. Complete. Willowbunch—One poll to hear from, gives Johnson, Liberal, 4,411; Gibbins, Conservative, 4,303.

Maple Creek—Four polls to come, Spence, Liberal, 1,596; Horne, Ind., 1,796.

Conceding these three seats to the Liberals gives the Liberal party 26 in the house and the Conservative 25.

Very Close Race

Regina, Sask., June 8.—(C. P.)—On the face of further scattered returns from the constituencies of Willowbunch, Happyland and Maple Creek, where the vote is very close, it was indicated that these seats were thrown back into the doubtful column at 11 a. m. today. The Liberals had claimed these by narrow margins, but Conservatives today declared that complete returns would probably throw Willowbunch to their side and that there was a possibility that the Liberal lead in the other two would also be eliminated.

Unofficial figures, obtained late last night from three doubtful constituencies, in the elections at Maple Creek, Willowbunch and Happyland indicated that the Liberals won all three seats.

In Willowbunch, with one poll to hear from, it was reported the Liberal candidate had a majority of 101. In Happyland, with all polls in, the Liberal majority was given at 65, while at Maple Creek, the seat of Hon. George Spence, with one poll to hear from the minister's majority was given as 200.

If the Liberals win these three seats it is indicated that the final result will be 26 Liberals, 26 Conservatives, four Progressives, five Independents, with two deferred elections in Cumberland and Ile a la Crosse.

Regina, Sask., June 11.—Conservative, Progressive and Independent candidates-elect—representing a substantial majority of Saskatchewan's next legislature—have called upon Premier James T. Gardiner, Liberal premier, to resign. A statement from Premier Gardiner indicating his intentions, is to be released Thursday or Friday following the publication of official returns, it is expected.

Resolutions asking resignation of the Gardiner government which has held power since 1905, were passed at a meeting of members today. Progressive and independents held a joint session in view of their possession of balance of power following the election last Thursday.

S. DILLINGHAM HAS SECURED
THE SALES AGENCY FOR
HUPMOBILE CARS AT MAC-
LEOD

S. Dillingham has the sales agency at Macleod for Hupmobile cars—Century Eights and Sixes. Demonstrations and information on request. Watch for the latest announcements regarding these exceptionally fine automobiles. Hupmobile manufacturers have never had an offer—never put a lemon on the market. The car of quality—a fair investigation of its merits will without doubt result in a prospective new car purchaser becoming a Hupmobile owner.

NOT FAZED

"At the student council last Saturday night my suspenders broke right in the middle of the floor."
"And weren't you embarrassed?"
"Well, not very. My roommate had them on."—Oklahoma Whirlwind.

AND POSSIBLY RETIRE

School Teacher: "If a farmer has 14,000 pecks of potatoes, and he sells them for 20 cents a peck, what will he get?"
Small Boy: "A set of golf clubs, a radio, and a town car."—Judge.

FILLING THE BILL

"Have you any overnight cases?"
"Yes, ma'am—plenty."
"Give me seven, then; I'll be gone at least a week."—Life.

Town of Macleod
Waterworks De-
partment

You are requested to co-operate with the Town by having all leaky taps, toilets, etc. repaired.

An inspection of all Water connections will be made at the end of this month.

GREAT ARRAY OF TALENT
MARSHALLED FOR IN-
STITUTE OF CO-OPERATION
JUNE 24-27 AT LETHBRIDGE

Arrangements will be brought to completion this week for the four-day session of the Alberta Institute of Co-operation to be held in Lethbridge Monday to Thursday of last week of this month.

Never before, it is safe to say, either in Alberta has a greater array of talent been marshalled to give information and inspiration along the lines of co-operation in the field of agriculture. Here are some of the subjects listed: "Co-operative Accounting," "Legal Aspects of Co-operation," "Social Control of Credit," "Co-operative Finance," "The Canadian Wheat Pool," "Selling Alberta's Wheat," "Progress of Livestock Marketing," "Co-operative Marketing of Wool," "The Alberta Dairy Pool," "The Canadian Poultry Pool."

In addition to the Alberta and Canadian experts who will deal with such subjects as the above, the following speakers of note from the United States will make their contribution: Clyde L. King, of the Wharton School of Finance and Commerce, University of Pennsylvania; Prof. J. T. Horner, secretary of the Dairy Products Research Bureau, Detroit, Mich.; Dr. E. G. Nourse, chief of the Agricultural Division of the Institute of Economics, Washington, D. C.; C. B. Denman, president of the National Live Stock Producers' Association, Chicago. Messrs. E. B. Ramsay, manager, and George McIvor, general sales manager of the Canadian Wheat Pools, will be the authorities giving addresses on the subject of wheat marketing.

The evenings are to be devoted to inspirational meetings at which speakers as Dr. H. W. Wood, Premier Brownlee, Dr. Wallace and Mrs. R. B. Gunn will speak; one of the evenings being devoted to a banquet. The four days will find their social climax at a U. F. A. dance to be held at the pavilion in Henderson Park on Thursday evening.

Registrations at the nominal fee of one dollar for the entire four-day series are being received by the registrar, M. L. Freng, district agriculturalist, Lethbridge. The U. F. A. locals of the Lethbridge area are each being asked to nominate one young person under 22 years of age whose expenses, including transportation and board and room for the four days, will be met from the funds of the Institute. Quotas of young people from the agricultural schools, the Women's Institute girls, C. G. I. T. and C. S. E. T. classes and Boy Scouts are also being cared for on the same terms.

LADIES OF THE ROYAL PURPLE
OF MACLEOD AND GRAMM
HOLD INITIATION

The ladies of Macleod lodge No. 28, O. O. R. P. on May 22 held an initiation with several ladies of Gratum lodge No. 24 present. During the lodge session speeches were given by the Past Honored Royal Lady Sandeche, and Honored Royal Lady Duley of Gratum, both ladies congratulating the Macleod lodge on the successful way the lodge work was done, also work done by the degree team. After lodge closed in usual form a delightful luncheon was served by the committee, about 50 ladies being seated around the tables decorated in purple and white. A social hour followed. Solos were sung by Lady Irene Morrow; the Highland Fling was danced by Lady Ina Baker; a reading in the York-shire dialect by Lady Louise Smith; comic sketches by Lady Irma Rutledge and Lady Anna West; a recitation entitled "The Cremating of Sam McGee" by Robert Service was very ably rendered by Honored Royal Lady Duley of Gratum; and Lady Pauline Thompson (Macleod) gave a character sketch. Then followed community singing, closing a most enjoyable evening.

On June 5, Royal Purple day, Macleod lodge No. 28 and Gratum lodge No. 24 again joined together in their day of charity and sisterly love by visiting the old folks at the Macleod general hospital. All met at the Elks' hall and proceeded in a body to the hospital, where they served the old folks with a lunch which was enjoyed immensely. On leaving each old man was given tobacco and candy, and the ladies a present of dainty handkerchiefs and candy, also a hamper of fruit was left for them. When the ladies of both lodges saw the way in which the old folks appreciated and enjoyed the afternoon it was decided to repeat another treat in the near future. It is more blessed to give than to receive.

OIL RIGHTS SECURED IN MAC-
LEOD DISTRICT

Macleod, June 8.—Oil rights on a large stretch of land surrounding the Town of Macleod have been filed on during the last week, and applications for other leases in the district have been made.

It is understood that a well is to be drilled in the vicinity of the town, and according to reports it is understood that a drilling outfit will arrive in the district very shortly.—Calgary Albertan.

What a difference there is be-
tween sunshine and moonshine!

ANNOUNCEMENT

Dilly's Cafe announces that they have installed new fountain equipment and are now in a position to serve you with ice cream dishes of all kinds, including Malted Milks, Sodas, Sundaes and Fancy Dishes. We invite you to try our ice cream service and we will endeavor to please you.

Town of Macleod
Waterworks De-
partment

You are requested to co-operate with the Town by having all leaky taps, toilets, etc. repaired.

An inspection of all Water connections will be made at the end of this month.

NEW MOTOR LAWS IN EFFECT
JULY 1—MAIN FEATURES OF
AMENDMENTS MADE LAST
SESSION OF LEGISLATURE

Edmonton, June 7.—The amendment made last session of the Alberta Legislature to the Vehicles and Highway Traffic Act, providing that all drivers of motor cars must carry a driver's license in addition to the regular car license plates, goes into effect July 1 next.

Its immediate effect will be that some 200 persons now driving autos in the province will be placed automatically on an interdicted list, and will be refused drivers' licenses to operate cars.

These people are epileptics and others whose physical condition renders them unsafe persons to drive autos. The provincial secretary's department has had this last list for some time, states E. Trowbridge, deputy provincial secretary, but has had no authority to prevent them from driving until the 1929 amendments were made to the act and became effective.

Under the amendments every driver of an auto must carry always a driver's license. This license will be issued to registered car owners after July 1, at a cost of 50 cents, and will be good until called in, for any purpose, so that it is not an annual license, to be renewed annually.

What Form Asks

Application for a driver's license must be made on a card, one of which will be mailed to every registered car owner in the province. The application asks the age of the applicant, sex, height, weight, color of eyes and hair, approximate number of miles driven, whether an habitual user of intoxicants, if any mental or physical infirmity, if applicant is familiar with the rules of the road and the motor laws of the province.

No person under 16 years of age may be licensed to drive a car, and any application for a license for a person between the ages of 16 and 18 must be accompanied by the signature of the parent or guardian stating that the applicant is competent to drive and knows the rules of the road and the motor laws.

It is not the intention to demand driving tests from existing license holders, nor will this be deemed necessary in the case of new applicants for driver's license, who have driven to any extent prior to applying for a license.

Where the license issuer has any doubt, he may ask that the applicant submit to driving tests before issuing the driver's license. Such tests will be carried out by some competent persons such as a peace officer, etc.

A person convicted of an offense under the act must hand his driver's license to the magistrate, who may suspend for any period, or cancel such license. Speeding, driving while intoxicated, and similar offenses may bring suspension or cancellation of the offender's license.

REPORTS CONTINUE GOOD
ABOUT KING

London, June 6.—The king passed a good night and was sitting up today when his physician, Henry Martyn, visited him, remaining about an hour. It was learned authoritatively he suffered no ill effects from the transactions of yesterday and the day before. Incident to a change in the nation's government.

If his majesty's slow progress continues, it was thought he would be able to adhere to his original plans and leave Windsor for Sandringham at the end of the month.

There has been a perceptible absence which formed at the old lung incision and was the cause of the present illness.

UTILITIES BOARD AT MACLEOD
HEAR CASE OF SEEPAGE
DAMAGE

Macleod, June 7.—The Utilities Commission was in session in Macleod Wednesday hearing the case of E. Emmekamp and T. S. McLean, for damage to their land and buildings from seepage of water from the irrigation ditch, which runs through their land. Judge Carpenter and E. W. Fream, members of the commission, heard the case. J. D. Matheson, K. C., represented the claimants and called several witnesses, while the irrigation company was taken care of by Mr. Charlesworth and Mr. Sander.

Judgment was reserved, awaiting further plans. K. Poelman, Gratum, presented his case through J. L. Fawcett, in which judgment was also reserved.

Mayor McDonald presented the case of the Separate school, asking to have the school rate in their district the same as that of the public school. Letters were read from the bishop and the local priest, guaranteeing the amount that would be required for the full payment of all accounts of the separate school district for the year 1929. Mayor McDonald also presented the case of the town of Macleod concerning certain lands that have been used for public roads, leading toward the Crow's Nest Pass, and also toward Calgary. This land matter will be taken up with the department and reported.

NEW LABOR MINISTRY IN G. B.
MAKES WEBB DOMINION
SECRETARY—SIR JOHN SAN-
KEY IS LORD CHANCELLOR,
PHILIP SNOWDEN CHANCELLOR
OF EXCHEQUER, A. HEN-
DERSON FOREIGN SECRE-
TARY AND J. H. THOMAS
LORD PRIVY SEAL—W.
JOWITT, A LIBERAL,
ATTORNEY-GENERAL—MISS
MARGARET BONDFIELD
CHOSEN AS FIRST WOMAN
BRITISH CABINET MINISTER

London, June 7.—Ramsay MacDonald, leader of the Labor party, is premier and first lord of the treasury in the new British cabinet officially appointed today.

Other ministers appointed were as follows: Chancellor of the Exchequer—Philip Snowden.

Foreign Secretary—Arthur Henderson.

Secretary of Dominions—Sidney Webb.

Lord Privy Seal—J. H. Thomas.

Lord Chancellor—Sir John Sankey.

Secretary for Scotland—W. Adamson.

Home Affairs—John R. Clynes.

Air Secretary—Lord Thomson.

Secretary for War—Tom Shaw.

First Commissioner of Public Works—Geo. Lansbury.

Minister of Health—A. Greenwood.

Minister of Labor—Miss Margaret Bondfield.

Minister of Agriculture—Noel Buxton.

President of Board of Education—Sir C. Trevelyan.

President of Board of Trade—William Graham.

First Lord of the Admiralty—Albert V. Alexander.

Other Ministers

The following were appointed to ministers outside the cabinet.

Chancellor of the Duchy Lancaster—Sir Oswald Mosley.

Solicitor-general—W. Jowitt.

Minister of Prisons—F. G. Roberts.

Minister of Transport—Herbert Morrison.

Parliamentary Under-Secretary for Scotland—Tom Johnson.

Postmaster-General—H. B. Lees-Smith.

Paymaster-General (without salary)—Lord Arnold.

The remaining appointments are under consideration.

Alberta V. Alexander, parliamentary secretary of the board of trade in the first Labor government was named first lord of the admiralty. He is an artisan engineer.

Woman in Cabinet

London, June 7.—The new cabinet which is to take the government of New Britain, with Rt. Hon. Ramsay MacDonald as prime minister, was completed today as far as its principal positions were concerned. The list will be submitted to the King tomorrow.

The first woman to hold a cabinet post in the British government was named in the list. She is Miss Margaret Bondfield, who will have the portfolio of minister of labor.

Another unexpected appointment was that of Sidney Webb as minister for the dominions. It had been understood that he had practically retired from politics because of advancing age. He will be 70 years old on July 3. Another appointment that caused instant comment in political circles was the naming of William Allen Jowitt as attorney-general. He was Labor member of parliament when MacDonald held power five years ago, but was elected to the new house as a Liberal last week. His defection from the party of David Lloyd George was announced at Labor party headquarters only a few hours before the cabinet list appeared.

Mr. MacDonald set at rest discussions as to his personal part in the first lord of the treasury, in addition to being prime minister.

Philip Snowden, who was Mr. MacDonald's right hand man in the 1924 government, and who has been one of the militant leaders of the Labor party throughout the five years of the Baldwin regime, was rewarded by being named to his old post as chancellor of the exchequer. He is to succeed the equally brilliant

TARY AND J. H. THOMAS
LORD PRIVY SEAL—W.
JOWITT, A LIBERAL,
ATTORNEY-GENERAL—MISS
MARGARET BONDFIELD
CHOSEN AS FIRST WOMAN
BRITISH CABINET MINISTER

London, June 7.—The appointment of Rt. Hon. Arthur Henderson, home secretary in the former Labor government, places at the head of the foreign office a man who has represented the Labor party in the house of commons longer than any other, and who would bring to the office extensive international experience.

Mr. Henderson was an outspoken advocate of the ideals of the late President Wilson, including his proposals of the League of Nations. In 1917 he went to Russia on a government mission. He represented the Labor government at Geneva in 1924, and in 1925 he made a tour of Canada and parts of the United States.

On his visit to the U. S., objection was raised to his filling a speaking engagement at Hartford, Conn., because of his radical views, but after some discussion he finally addressed the foreign policy association there.

It is generally believed Mr. Henderson will work for the establishment of a sound and lasting agreement between Great Britain and the U. S., which Mr. MacDonald has declared is essential to the world's peace. He shares with the new premier and other party leaders the aim to strengthen in every possible way the machinery for international conciliation and arbitration.

State Ceremony

Windsor, June 7.—The state ceremony of handing over the seals of office by members of the retiring government, impressive enough under ordinary circumstances, but acquiring unusual interest because of the peculiar circumstances necessitated by the King's illness, took place at Windsor Castle this afternoon. The Conservative ministers drove to Windsor Castle in a body.

FIRST TRANS-ATLANTIC
FLIGHT

The first Trans-Atlantic flight was successfully accomplished by two British aviators, Captain John Alcock, D. S. C. pilot, and Lieutenant Arthur Whitten Brown, navigator, the machine used was a Vickers Vimy Rolls Royce twin engine.

It was a marvellous flight and greater glory attaches to it because it was made under bad weather conditions; indeed fog so obscured vision at times that the machine discovered to be flying upside down and once only fifty feet from the water.

The project of the Atlantic flight was originated by the late Viscount Northcliffe in the London Daily Mail in April, 1913, and suspended during the war.

Captain Alcock and Lieutenant Brown left St. John's Newfoundland at 5:13 p. m. Saturday, June 14th, 1919, and landed near Clifden, Galway, Ireland at 9:40 the next morning—a flight of 1880 miles, taking only fifteen hours fifty-seven minutes—a truly marvellous flight, which won for the victors a prize of 10,000 pounds.

Both Captain Alcock and Lieutenant Brown were knighted by His Majesty the King in 1919. Sir John Alcock crashed during a flight about a year later and was killed.

UTILITIES BOARD AT MACLEOD
HEAR CASE OF SEEPAGE
DAMAGE

Macleod, June 7.—The Utilities Commission was in session in Macleod Wednesday hearing the case of E. Emmekamp and T. S. McLean, for damage to their land and buildings from seepage of water from the irrigation ditch, which runs through their land. Judge Carpenter and E. W. Fream, members of the commission, heard the case. J. D. Matheson, K. C., represented the claimants and called several witnesses, while the irrigation company was taken care of by Mr. Charlesworth and Mr. Sander.

Judgment was reserved, awaiting further plans. K. Poelman, Gratum, presented his case through J. L. Fawcett, in which judgment was also reserved.

Mayor McDonald presented the case of the Separate school, asking to have the school rate in their district the same as that of the public school. Letters were read from the bishop and the local priest, guaranteeing the amount that would be required for the full payment of all accounts of the separate school district for the year 1929. Mayor McDonald also presented the case of the town of Macleod concerning certain lands that have been used for public roads, leading toward the Crow's Nest Pass, and also toward Calgary. This land matter will be taken up with the department and reported.

INCREASED AUTOMOBILE
REGISTRATION

The number of automobile licenses issued in Alberta during the first five months of 1929 exceeds by over 3,000 the total number for the year 1928. It is announced by E. Trowbridge, Deputy Provincial Secretary, already this year over 90,000 cars and trucks have been registered as compared with 87,221 last year. A considerable increase in the consumption of gasoline is also indicated in Mr. Trowbridge's report which shows that the revenue from gasoline tax for the first five months has exceeded that of the same period in 1928 by some \$170,000.

SERIOUS FOREST FIRES IN
NORTH

Reports from the McMurray district in northern Alberta indicate that forest fires have swept a considerable area and that the rangers of the Dominion Forestry Service are with difficulty keeping the flames in check. Little rain has fallen in the area between McMurray and Peace River and a number of small fires have rapidly assumed serious proportions.

VESUVIUS IS STILL CAUSING
MUCH ALARM

Naples, Italy, June 6.—Explosive activity in the eruptive cone of Mount Vesuvius increased today with tremendous barrages of rocks and ashes bombarding the walls of the ancient crater. There was a slight subsiding in the flow of lava, however.

An official bulletin from the Vesuvius observatory said further danger probably would be avoided, yet it concluded: "But the life of volcanoes is so mysterious that one cannot judge the outcome from the appearance of the moment."

Villagers around the southern and eastern base of the volcano were panic stricken as they deserted their homes near the ruins of Pompeii, destroyed nineteen centuries before, always mute testimony of what Vesuvius could do.

Trudging behind the two-wheeled carts which carried household effects and all their worldly possessions, they feared that they might be delivered from the "crater of Vesuvius," and sang hymns of trust and faith in Providence.

The erstwhile busy little village of Terzigo was becoming encircled with a belt of lava. The lava oozed around the dwellings, smoke poured from windows, and the walls bulged like the skin of a baked potato. As the walls crumbled the houses appeared in the river of fiery liquid rock. The speed of the flow was asserted by observers to be as high as 1,500 feet an hour.

JAPANESE SHIP IS TOTAL LOSS
—700 PERISH

London, June 5.—A message to Lloyd's of Yokohama today said the Japanese steamer Ugo Maru was reported a total loss from fire with the crew and passengers believed drowned. The fire began May 31.

Other Japanese despatches said the ship was afire with 700 Russian passengers, 380 of them women, and 43 Japanese crew members.

Benzine Was Ignited

Tokio, June 5.—The Ugo Maru, reported to be lost, left Vladivostok on May 23 en route to the fishing banks on the east coast of Kamchatka. On May 28 benzine in the hold was ignited, the blaze finally getting beyond control of the crew.

The ship was of 3,682 tons, and though Japanese-owned, had been chartered by the Soviet fishing fleet. It carried 700 Russian fishers, of whom 380 were women, and a Japanese crew of 43. It was understood here that the Vladivostok authorities were suppressing the news, fearing that it might

THURSDAY, JUNE 13th, 1929

TOO MUCH HERO

Wearied newspaper readers on this continent will smile gently at the news that Colonel Lindbergh and Ann Morrow fooled the hungry press by getting married quietly and unexpectedly.

Charles Augustus Lindbergh is a remarkable young man, a brave and exceedingly able young man. But unless the daily press of United States leaves him alone for awhile, the press will bore the public to death with him.

Certainly the people of Canada, through this interminable and fawning publicity, have long since lost that reverence for Lindbergh that his flying abilities and his flight over the Atlantic earned for him.

United States has produced many men of heroic stature. In science, statesmanship, war and adventure, that country's history has been filled with outstanding figures.

But why do the American people insist on boring everybody blind with them?

Admiral Dewey was the great hero of the Spanish-American war. But two years after his exploits in Manila Bay, he was hissed in the

streets simply because unrelenting and nauseous publicity had made the public sick of him.

President Wilson went down to the political valley of the shadow in his own country because the Democratic press tried to shove him down the throats of his countrymen as a demagogue.

Canada errs on the side of suppressing and even belittling her great men. United States rides her heroes to death.

Surely somewhere between these two attitudes can be found a method of treating famous characters so that the public will get enough hero worship without getting too much to the point of nausea.

Fame depends upon deeds being remembered and men being forgotten. United States might start with Lindbergh.

IT ALL EVENS UP

Women, keeping slim by abstaining from starches and living on two meals a day, complicate the wheat farmer's problem, remarks a Canadian National Railways official. That is unfortunate, at the moment, for the farmers, but fortunate for the human race, since men follow the examples set by women. Ultimately all will gain.

Textile interests not so long ago were up against the same problem. Women, reducing their once voluminous clothing and adopting light, healthy garb, automatically cut the demand for wool and cotton in two. By turning to silks, they reduced it still further. Demanding floors they could keep free of dust, they switched out the old-fashioned, nailed-down carpet. And so on.

But they made up for quantity with variety. Clothes manufacturers concentrated on styles and offered their losses. Silk worms lost their monopolies and factories began to do their work. Flooring manufacturers made similar gains. Cosmetic producers, shoe factories, milliners, jewelers, all benefitted.

Now it comes to wheat. But to eat less food and better combinations

means longer life. By living longer, people will consume as much as before, only they will take more years to do it. Meanwhile they will contribute their part to the demand for all commodities, including other forms of food.

The world keeps its balance. A loss here means a gain there. And somehow or other the race finds itself better dressed, better fed, longer lived and generally better off than ever before. That includes the farmers.

POPULATION THE WORLD'S PROBLEM

Signor Mussolini has added new measures to the pressure he has already brought to bear upon Italian parents to produce more children.

How does he propose to feed this increased population? All over Europe population has outrun subsistence. Half the women and children of that continent have never had enough to eat nor enough to wear.

European countries, like Italy, that are increasing their population rapidly, have for the past generation depended upon the food production of lightly populated countries such as Canada and United States.

But what will happen when population begins to outrun subsistence in United States?

United States has doubled her population in the past 40 years. If that population doubles again in the next 40 years, as is reasonable to expect, there will be 240,000,000 people in that country to be fed and clothed.

Achievement of that population figure will inevitably create a class that will know hunger. United States will begin to look for food.

And the only place towards which United States can look for food is Canada.

Canada's lack of a great population has been regarded as a calamity. It may be a blessing.

Canada can afford to sit tight, keep her breed pure and her herd small and wait.

MAKING OTHERS LIKE US

Canada and Australia are such good friends that "they can swear at each other cheerfully," says R. A. Haynes, Australia's commercial representative to Canada.

That is the relation we want with sister Dominions, with Great Britain, with United States. Mr. Haynes' happy phrase epitomizes the new diplomacy of business that breaks down obsolete barriers of ceremony and suspicion. It expresses the ability of a nation to go into the capitals of the world and tell them by words and deeds what it wants and is prepared to offer.

Candor makes for friendship in this age, and candor makes for suspicion. It is that gift of "swearing at each other cheerfully" that will get us more trade with Australia, more working capital from Great Britain, better tariff terms with the United States.

It takes the bluntness of commerce to put force into sweetness of diplomacy.

GETTING HIS ROUTE FIXED

A very small boy was trying to lead a big St. Bernard up the road. "Where are you going to take that dog, my little man?" inquired a passer-by.

"I'm going to see where—where he wants to go first," was the breathless reply. — Progressive Farmer.

Spring Point News

Spring Point, June 12.—Mrs. E. Risler and daughter Gladys of Lethbridge spent the week-end with Mrs. Risler's parents, Mr. and Mrs. Frank Stones.

Mr. F. Nowland of Claresholm spent last week at the Hunter ranch. Mrs. Mark Waldon of Claresholm motored to Spring Point last week, spending a few days at her old home, also visiting numerous friends.

Mr. and Mrs. T. S. McLean of Macleod spent last Wednesday visiting their daughter, Mrs. G. Hutton.

Mr. O. J. Collis and Arnold Jordan motored to Lethbridge on Friday.

Mr. and Mrs. A. West were visitors at the Hunter ranch on Sunday.

A large crowd assembled at Spring Point baseball grounds on June 9th, to witness a game, Macleod vs. Spring Point. Score—3-0 in favor of Macleod.

Mr. and Mrs. James Hartley, Miss McHattie and Mr. and Mrs. Smith, all from Macleod, were visitors at the Stones ranch on Sunday.

WINNIPEG KIDDIES MAKE GREAT HIT AT EMPRESS THEATRE

Delighted audiences welcomed the Winnipeg Kiddies in the Empress Theatre Macleod Friday and Saturday night, when they put on a wonderful program of musical and comedy numbers and acrobatic feats.

Mrs. McLasky, the producer, pianist and director is to be congratulated on the marvelous proficiency of the young artists, showing wonderful patience and ability in training them for such a varied program. There were seven little folks taking part and every one was a star. Bobby Laskey, a wee chap of about 7 or 8 summers, known as the juvenile Beau Brummell, is a natural born actor, and created great amusement by his funny mannerisms and expressions.

Baby Loretta Ross, Winnipeg's baby star, a wee tot of 6 summers, was a special favourite and was recalled over and over again. The Davidson twins two small girls, gave some lovely numbers in harmony duets and action songs. Jean Walker, the ballet queen, delighted the audience with her singing and dancing. Jimmy Fisher, a lad of 11 years, was also good in his parts, dressed as a scotch lad in kilts. Last and not by any means least was Gracie Cumbers, the acrobatic dancer, her performance being certainly wonderful for one so young, more like a seasoned professional. Altogether it was a great treat to witness such young performers, they were so natural and they evidently enjoyed the fun they were creating just as much as the audience.

Empress Theater Current Attractions

"THE WARE CASE" A STUPENDOUS CRIME PICTURE—CHARMING ENGLISH BEAUTY SPOTS—SPECTACULAR STORY'S BACKGROUND—BRILLIANT PLAYERS—STEWART ROME AND BETTY CARTER, POPULAR LONDON PLAYERS, HEAD THE CAST

In recent years the advance in quality of crime and mystery screen productions has been most marked. One of the best of these is First National's picture, "The Ware Case," which comes to the Empress Theatre on 19th and 20th. The manner in which the film has been di-

rected, the careful selection of the locations, initiative employed in obtaining unusual studio sets, the expert manner in which the scenario was prepared and the capable work of the actors to whom the various roles were allotted, resulted in one of the finest screen plays yet produced.

"The Ware Case," while British in its characters and in locale, is universal in its appeal to lovers of crime and mystery stories. Some of England's most charming beauty spots were utilized as a background for this thrilling drama, including the gardens and lake in the woods surrounding one of the most picturesque mansions in the Thames Valley, a typical London home in the West-End and other places of especial appeal. An exact replica of one of the courts in the renowned Central Criminal Courts, the world-famous Old Bailey, was erected for the trial scenes, which included some of the most thrilling moments in the picture.

RONALD COLMAN AND VILMA BANKY CO-STARRED IN "THE MAGIC FLAME," NEW SAMUEL GOLDWYN FILM—STORY OF CIRCUS AND ROYAL COURT LIFE HAS RONALD COLMAN IN TWO ROLES—FRIDAY AND SATURDAY

Ronald Colman plays two roles in the film, that of a clown and that of a count. It is Vilma Banky, an aerial artist, whom Colman's two characters love and struggle for. Into the warp and woof of that conflict Henry King has injected romance, surprising situations, humor, satire, physical struggle, a pair of murders, a balloon ascension and parachute jump, a whole circus film.

ed in its colorful details, and directorial acumen such as the movie-going public has come to associate with his name.

The action of the story occurs in a Mediterranean country, Baret's circus furnishing the background against which Vilma Banky and Ronald Colman make love. It is when Colman, the Clown, has triumphed over Colman, the Count, that the locale is switched to the Royal Court, with the Clown accepted on all hands as King of Illyria. When Vilma Banky arrives at the court to avenge the murder of her lover, the Clown, she does not suspect the true identity of the monarch. It is with the disentanglement of this tense situation that the plot thereafter is concerned.

UNDERWORLD AND NEWS-PAPER WORLD UNITE TO MAKE "SHADOWS" OF THE NIGHT" NEW AND THRILLING PICTURE ENTERTAINMENT

Vivid adventures of newspaperdom and city life form the basis of "Shadows of the Night," Metro-Goldwyn-Mayer's new thriller of the screen, which is now being seen at the Empress Theatre, with Lawrence Gray, Louise Lorraine, and "Flash," the famous police dog actor.

The story, directed by D. Ross Lederman, is a vivid tale of a reporter's chase for a bandit leader, assisted by his dog. The trail leads through the New York underworld, into the haunts of gangsters, and vivid battles, hairbreadth escapes and other rapid-fire excitement is blended into a pretty love story between the reporter and a cabaret dancer who aids him in his quest. Louise Lorraine plays the girl.

Cleaning the Average Home Made Swift and Thorough

THE PREMIER JUNIOR makes child's play of cleaning in the average small home. It is so fast and thorough . . . because the Junior was designed with every need of the average small home in mind.

Weighing only 7 lbs. and fitting in the storage space of a broom, the Premier Junior cleans with a swift efficiency that is only possible with Premier action—the combination of powerful super-suction with a motor-driven brush.

Just watch the Junior at work in your own home. Its swiftness and its thoroughness will surprise you.

Alberta Institute of Co-operation

Lethbridge Olds Vermilion

JUNE 24 - 29th, 1929

Arrangements have been completed for the holding of three separate Institutes of Co-operation in the Province, similar to the one which proved so successful at Edmonton last year.

The meetings will be addressed by speakers who are outstanding authorities on various phases of co-operation in many parts of the continent, and special attention will be paid to the problems in co-operation affecting Alberta farmers. The co-operative marketing of wheat, livestock, dairy products, and poultry and eggs, and the consumers' co-operative movement will be considered and discussed.

Special arrangements are being made for the junior section of the Institutes, and for the instruction and entertainment of the young people who will attend.

Plan to attend the Institute nearest your home, and in order to ensure accommodation, communicate at an early date with the registrar—

M. L. FRENG, Dist. Agriculturist, LETHBRIDGE, Alta.
F. S. GRISDALE, Principal, School of Agriculture, OLDS, Alta.
W. J. ELLIOTT, Principal, School of Agriculture, VERMILION, Alta.

TO STUDY CONSERVATION OF NATURAL GAS

Dr. R. C. Wallace, president of the University of Alberta and A. A. Carpenter, chairman of the Board of Utility Commissioners, are the Alberta members of a committee who will co-operate with Dr. Chas. Cammell, Deputy Minister of Mines, Dr. A. W. G. Wilson and C. C. Ross appointed by the Dominion Government to investigate the possible conservation of natural gas at present going to waste from oil and gas wells in this province. The committee will look into such matters as the conservation of gas by storage underground and the utilization of gas as a fuel or as a source of other materials such as oil, carbon black and various chemical products.

ICE—AND OTHER IMPORTS

Canada buys ice in the United States. During the last fiscal year this country imported \$11,537 worth of the commodity in which a large part of this country excels.

That seems funny. It is funny. It is as grotesque as the importation of buttonholes. But it is no more absurd than many other imports from the United States of goods no better than Canadian articles at the same prices, and in some cases inferior. "Imported" has a magic allurements for many people. Canadians should examine their household budget. They will be surprised at the number of Canadian-made articles on which they can save money, either in quality or cash—or both.

What a lot of "canned music" some of us would like to "can," if we only could.

Lowest Price in Frigidaire history

THE new Frigidaire represents the greatest value ever offered in electric refrigeration. It embodies every essential Frigidaire feature—including the famous Cold Control. It is offered at the lowest price in Frigidaire history—and with General Motors easy payment terms. It operates from farm electric plants or central station current. See it right away.

McNeil Electric Company
Macleod Alberta

Phone 186

CELEBRATE PRODUCTION OF MILLIONTH FRIGIDAIRE UNIT

High explosive bombs crashed for an hour above the city of Dayton, Ohio, the other day as the one millionth refrigeration unit to be built by Frigidaire Corporation came through one of its many conveyor lines and emerged as a finished electric refrigerator, all ready to freeze ice cubes.

Beneath the bomb smoke, flags fluttered from roofs of the factories and office building. But there was no sounding of whistles to signal even a short shut-down. With the plants far behind orders thousands of employees continued their work, while the steady reverberation of bombs marked the building of the millionth unit.

For many weeks three shifts of workmen had been tending the fifteen great porcelain enameling furnaces, held unvaryingly at 1600 degrees Fahrenheit. For weeks and weeks other departments had held to the same operating schedule. In one day 134 carloads of finished products were shipped from the factories. And on the day the millionth unit was completed the factories were still further behind orders than they were two months earlier.

The millionth Frigidaire, bearing a gold aerial plate, was shipped by airplane to Atlantic City to be a featured exhibit at the annual convention of the National Electric Light Association.

Refrigeration equivalent to 120,000 tons of melting ice daily is the capacity of the one million units already built, according to E. G. Biechler, president and general manager of the corporation. This ice tonnage would be sufficient to supply 9,600,000 families with 25 pounds of ice daily.

There is a vast difference between the units of 1917 or even as late as 1921 and our present models," said Mr. Biechler. "Back in 1922 there were but two Frigidaire models, one a household cabinet with nine cubic feet of storage capacity and the other with fifteen cubic feet for food storage. The factory price of the lowest priced model, was then \$850.00. The lowest priced model now sells for only one-fifth that price at the factory."

"Production of each quarter of a million marks a very definite period in development of Frigidaire equipment. The first ten years was a period of small production and basic development. The second quarter of a million marked the period when the business was placed upon a mass production basis, and all fundamental problems solved. The third quarter of a million followed the introduction of the new Frigidaire, with its quiet mechanism. The fourth quarter of a million will always be associated in history with the introduction of the Frigidaire Cold Control, the greatest single contribution to household refrigeration since the building of the first ice box."

SO THAT'S WHAT THEY ARE!

Little Clarice's French tutor had been endeavoring to teach her that there are only two genders in the French language—masculine and feminine. Next day, desirous of learning if the child had remembered, she asked, "How many genders are there in French?"

"Two," came the quick response. Much gratified, the tutor then asked, "And what are they?" After a moment's reflection, Clarice replied, "Masculine and genuine."—Christian Science Monitor.

MODERN ATLAS

Mike and Pat were arguing about their ability to carry loads. Pat claimed he could carry 200 pounds. "But I did it yesterday," persisted Pat.

"Did yez carry a barrel of flour, then?" asked Mike.

"I did not. But I carried an automobile tire over each shoulder sivin blocks for the boss. And I heard the man say there was 100 pounds of air in each wan av thim."—Christian Science Monitor.

GOVERNMENT COLLECTING AGRICULTURAL STATISTICS

The co-operation of farmers and others throughout the province is urged during the present month in the agricultural survey being conducted by the Dominion Bureau of Statistics. On cards which are circulated through rural schools, farmers are asked to report the number of acres of the various crops being grown this season and the number of live stock of various classes kept on their farms. It may be pointed out that the information when supplied to the government is of a confidential nature as far as the individual farmer is concerned, and that those supplying the information asked for are greatly assisting the government in compiling its agricultural statistics from which crop reports are later issued.

NOW IT'S YOUR TURN

Three men of different nationalities were discussing the size of present-day liners.

First Man: "Our ships are so large that the captain requires a motor-car to go round issuing orders."

Second Man: "In our liners the chief engineer has an airplane for making his inspection of the engines."

Third Man: "In our boats the chef needs a submarine to go through the soup to test the potatoes."—Montreal Star.

WHAT ABOUT THAT OTHER \$100?

"I'm a \$100-a-year man." "Then that makes your wife a \$9000-a-year woman, doesn't it?"—Christian Science Monitor.

Correct this sentence: "Her dinner was so good," said one of the female guests, "I didn't notice how she had the silver arranged."

4000 miles for a better crude

In far Peru—more than 4,000 miles from the stations where you fill with Marvelube—Imperial Oil secures the rich petroleum from which this better motor oil inherits its lubricating superiorities.

To bring this better crude to Canada in Imperial's own ships and transform it by special processes into Marvelube is an undertaking which is possible only because of Imperial Oil's immense resources and facilities.

But Marvelube, a better oil because of the natural lubricating superiorities of its carbon-free, sulphur-free base, is

well worth the huge effort and investment. Marvelube is preferred by aircraft operators because it ensures a greater margin of safety in the air and gives longer periods between engine overhauls. It is the favorite oil of more than a half million motorists in Canada, because it ensures smoother, more powerful, more economical operation. There is a grade of Marvelube refined to meet exactly the specifications of your car, truck or tractor. See the Marvelube Chart at Imperial Oil stations and dealers.

McCORMICK - DEERING NEWS

"Good equipment makes a good farmer better"
House Phone 11 Published by Office Phone 157
C. E. TWEED
THE FARM EQUIPMENT MAN

Vol. 1, No. 10 Macleod Thursday, June 13, 1929

Watch for the "News" each week. Suggestions and news items invited.
Claude Tweed, Editor

The will of an Omaha photographer recently filed showed an estate worth over a quarter-million. He developed quite a roll.

When you drive home with a new McCormick-Deering mower—any size or style—you are racing in on nearly a century of successful manufacturing experience. It means something to you.

Perhaps the most talented linguist on the North American continent is the man who can speak Yiddish with only one hand.

Hay crop is coming on fast. Are you ready? You can't cut this year's crop with a pair of shears, so better come in and take out a new McCormick-Deering Mower.

Cinderella went to a dance in glass slippers, but that was before the advent of the Charleston.

McCormick-Deering Self-Dump Rakes are well and favorably known wherever hay is raised, because of their durability. They dump quickly and the teeth return to the ground promptly, so there is no waste of hay.

One of the most prevalent superstitions among those on a reduction diet is that eating out of the ice box at 11 p. m. doesn't count.

Won't you let us tell you about the McCormick-Deering Self-Dump Rake, quote you prices, and suggest convenient terms? If you need a rake, now is the time to buy and this is the rake to buy.

One idea that girls will have to get rid of is that a smile is

Kill the weeds and make a fine compact seed bed at the rate of 35 acres a day with the McCormick-Deering 12-foot field cultivator. We have them also in three other sizes.

Tobacco is a nauseating plant consumed by only two creatures—a large, green worm and man. The worm doesn't know any better.

Some time when you want to hear us talk a long time, ask us to reel off the names of all the folks who have bought McCormick-Deering Tractors during the past two or three years. Geo. Pearson and P. Dyck are the latest converts.

Ask H. Jones or W. Scott or J. Horner what they think of the McCormick-Deering rod weeder. After you have heard their favorable comments come in and place your order.

For summer-fallow you can find nothing better or faster than the McCormick-Deering rod weeder. It sweeps everything in its path and cuts 13 feet.

Sometimes when we get a little discouraged, as all mortals do, some good friend drops in and says "My McCormick-Deering is the best I ever used," and all our troubles are forgotten.

The gang drawers on the McCormick-Deering Field Cultivator are so rigidly fastened that the shovels cannot dodge around longrooted, tough weeds. Everything is sliced off under the ground.

Careful design, field trials, accurate manufacture, expert inspection and honest selling are back of every McCormick-Deering machine.

LOCAL AND PERSONAL NEWS

Mrs. Geo. Skelving was a visitor in Lethbridge last Thursday.

J. A. Booth returned on Saturday from a two weeks vacation spent at Lloydminster.

Mr. and Mrs. G. R. Leighton and Mrs. A. Ross-McLaren motored to Calgary for the week-end.

Gordon McLeod accompanied by Miss Peterson, both of New Dayton, were guests of Mr. and Mrs. Alex McLeod last Sunday.

Mrs. A. Ross-McLaren, accompanied by her niece, Miss Isabel Leighton, has returned to her home in Regina.

At the Board of Trade meeting on Monday evening no matters of importance came up for consideration, routine business only being the order of the meeting.

Mrs. C. J. Reach, of Macleod, is visiting in Calgary this week, attending the wedding of her son Charles, which took place on Monday.

Miss Mabel Young is home from Crossfield on account of the illness of her mother, Mrs. Arthur Young. Mrs. Young is progressing favorably toward recovery.

Mr. and Mrs. J. S. Hunt, of High River, and Mrs. Brown, of Edmonton, were guests of Mr. and Mrs. H. H. McLean and Mr. and Mrs. J. B. McLean this week.

J. D. Matheson, K. C., accompanied by Mrs. Matheson, Mrs. M. Stewart and Orville Stewart motored to Calgary during the first of the week.

O. H. Evans left on Saturday, June 1st, for Taber, where he was called by the illness of his father, who later died on June 5th, being buried on Friday, June 7th.

W. Ulrich, accompanied by Miss Florence Ulrich, motored over from Champion on Saturday to visit Miss May Ulrich. Mr. Ulrich returned home Saturday evening while Miss Florence is spending the week with her sister.

They say: "Dillingham says his new Hummobile is the only car in the world." Let the old boy have his joke—he's agent for the car anyway—what would you expect him to say under such circumstances.

Mr. and Mrs. W. Gammon and family accompanied by Mr. and Mrs. Henderson and family, all of Washington State, were guests of Mr. and Mrs. D. Gammon on Monday of this week. The party were en route to Peace River by auto.

The marriage of Charles S. Reach, son of the late C. J. Reach and Mrs. Reach, of Macleod, to Miss Marion Taylor, daughter of Mr. and Mrs. W. Taylor, of Calgary, was solemnized at Calgary on Monday, June 10th, the Rev. Driver officiating. The newly married couple will, on their return from their honeymoon, take up residence at Macleod.

A movement is afoot amongst the Boards of Trade and U. F. A. Locals of Southern Alberta and Eastern British Columbia to join in a gigantic picnic at Waterton Lakes National Park on Monday, July 1st, Dominion Day. The Macleod Board of Trade is making an effort towards affiliating in this outing—further announcements to be made later.

CHAUTAUQUA PROGRAMS AT MACLEOD GREATLY APPRECIATED—SURPLUS OF \$140

Chautauqua has come and gone from Macleod, and a series of most delightful and entertaining programs were presented during the four day circuit. The first evening's program last Saturday was spoiled by the rain, but the following three days the attendance both afternoon and evening fully made up for the first evening. At the evening programs the big tent was filled to seating capacity on Monday and Tuesday, but on Wednesday the last performance, there was scarcely standing room.

The committee of guarantors met Friday night to receive the financial statement and the report showed that about \$140 will be the balance over after paying all expenses, and 130 jacks which were made for the seats is also paid for and will be kept for future use. The guarantors voted that the balance would go towards the erection of a swimming pool, a scheme for which will be started in the near future.

SHEEP POISONED BY DEATH CAMAS

Following reports received from the Jenner and Atlee districts in south eastern Alberta, Dr. P. R. Talbot, Provincial Veterinarian, recently visited these localities and found that the death of a number of sheep had been caused by their eating a weed known as Death Camas. This weed which grows commonly in a number of districts in the south has been more prevalent than usual this season owing to climatic conditions. Its effects appear to be more serious when sheep are hot and hungry. The Death Camas belongs to the lily family, grows on sandy soil and is usually found on the slopes of hills facing south, and sheep eating it show the following symptoms: frothing at the mouth, twitching of the muscles and convulsions followed by death. Shepherds are advised to keep their flocks away from areas where this plant has been discovered.

A very satisfactory antidote in cases of poisoning from this weed consists of one dram each of Potassium Permanganate and Aluminum Sulphate dissolved in a pint of water, this quantity being sufficient for about 12 sheep.

Mr. and Mrs. J. Swinerton, accompanied by Mrs. R. M. Reid, were visitors in Lethbridge last Friday.

Miss Margaret Graham, of Lethbridge, is spending her holidays with her mother at Macleod.

S. Dillingham, accompanied by Miss May Ulrich and J. Dillingham, were motor visitors to Calgary on Monday.

Mrs. J. R. McLean left on Tuesday last for an extended visit at Seattle, Wash., going by way of Vancouver, at which point she will spend a few days.

Mrs. H. C. Winter is in Calgary this week with her young son Gordon, who is receiving dental and medical treatment in the Calgary Hospital.

Miss Catherine Mercer, of Macleod, whose marriage to Capt. H. E. Henderson took place on Wednesday evening was the raison d'être of several charming affairs in Macleod. Miss Gwendolyn Martin entertained at a linen towel shower in her honor on Friday, while the Royal Golf course was the scene of a pretty gathering on Saturday afternoon, when Mrs. L. A. Huntley and Miss McLaren entertained for Miss Mercer at a miscellaneous shower.

MACLEOD AGRICULTURAL SOCIETY WILL HOLD ONE DAY FAIR SEPTEMBER 25th—LIVE STOCK CLASSES WILL BE ELIMINATED—WILL CONCENTRATE ON GRAINS, GRASSES AND VEGETABLES

The Agricultural Society of Macleod will hold a fair this year, along rather different lines, from the old time style of fairs which has been held during the past 30 years or so in Macleod.

Like a great many other fairs throughout the province, Macleod has found it almost impossible to get the farmers of today, to bring out their livestock to the fair. The auto, truck and tractor have changed entirely the conditions of the modern farmer with the result that the same attention is not being given, especially to the breeding and rearing of pure bred horses that was the case 10, 15 or 20 years ago. The same thing applies to all kinds of live stock on the farm.

The Macleod Society has therefore decided to cut all livestock from the fair, and concentrate their efforts on making an extra big showing of grains, grasses, vegetables, dairy products, domestic products and ladies' fancy work. The directors, at the meeting this afternoon, increased considerably the prizes for grains and grasses, the idea being to increase the number of exhibits in these classes. A new departure this year is offering large cash prizes and a number of special prizes for district exhibits, and individual farmer exhibits.

The district exhibits will be from the school districts tributary to Macleod, and a number of names was suggested at the meeting, for each district, to act as committees to arrange and select the exhibits from the various districts. It is hoped and expected that a large number of districts will take part, which would create a great interest and be a splendid attraction for the fair. The date fixed for the fair is September 25, one day only, and the school fair and kiddies sports will be held the same day.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION—READY FOR SCHOOL?

It may appear as if this article had been given, by mistake, a May date for publication instead of one in September. Just now, most people are likely thinking of the close of school, or promotions and summer vacations. It is, however, time for thought, particularly concerning the children who will be starting to attend school for the first time this autumn.

Whenever and wherever a group of children are examined upon entering school, quite a high percentage of them are found to require medical care. They are not ill, but they have what are generally called defects. These defects may be diseased teeth or tonsils, adenoids or some similar condition. Such defects do not make the child ill in the ordinary sense of the word. They are, however, a serious handicap to the child; they constitute an additional burden which drains the child's reserve. No parent would deliberately do anything to interfere with his child's physical or mental development, yet the parent who does not have his child's defects treated is not allowing the child a fair chance.

Now is the time to have the child who has not yet attended school examined, and, if he is found to have defects, to have them treated. By having this done now, the child will have the summer in which to build up his health, so that he may start to school this fall properly prepared to secure the greatest benefit from his school attendance.

We have stated that defects do not cause the child to be ill. This does not mean that defects are not a serious menace; they are. The damage done by defects is not, as a rule, seen until adult life. A large percentage of heart disease, of kidney disease and other diseases of middle life are due to neglect of diseased teeth, tonsils and other such parts where there is infection; that is, living germs.

The early proper treatment of defects is our chief hope of decreasing those diseases which now take a heavy toll at middle age.

Questions, concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by correspondence.

FULL SHEETS OF FOUNDATION AND WHY

Foundation is used for four reasons, namely, for the production of strong combs well attached to their frames, to save the bees energy and time in building the combs, to ensure a maximum number of worker cells, and to encourage the bees in building straight combs. Only by using full sheets of foundation can all these aims be attained.

There are a few beekeepers who still adhere to the old practice of supplying the bees with 'starters', because it seems to cost less and is fairly satisfactory. The slight saving on initial cost is poor business, for by so doing, the two most important aims for giving foundation are defeated.

In the first place the bees are not saved the time and energy that they would have had full sheets of foundation given. It is commonly understood that the production of wax and building of comb takes more energy from the bees than the production of honey; if full sheets of foundation be given, then the energy of the bees is being conserved. While the bees are building that part of the comb that comprises the foundation they are using time that might otherwise be used in the storing of honey. Furthermore, it requires about ten or twelve pounds of honey to manufacture a pound of wax. At ten cents per pound for honey, the cost of making a pound of wax is one dollar. Foundation can be purchased for about seventy-two cents per pound.

A second important argument in favour of supplying the bees with full sheets of foundation is that they will then build the entire comb of worker cells. A great many combs built from starters contain a considerable proportion of cells for the rearing of unproductive drones. There is no doubt whatever that beekeepers are well advised to use full sheets of foundation.

PROTECTION OF ROSE FOLIAGE

Good foliage is essential to the production of good roses and, moreover, good foliage is desirable in a rose garden because of its appearance. Leaves which are mildewed, spotted or partly eaten by insects take away very much of the attractiveness of a rose garden. The easiest insect to control is the Rose Slug, a green caterpillar, which does not usually appear in great numbers but which works on the underside of the leaves and eats out pieces. These may be picked off by hand when bushes are few but the surest way is to spray with arsenate of lead in the proportion of four ounces to ten gallons of water. The Aphid, or green fly, is often troublesome, as is also the Leaf Hopper. These suck the juice from the foliage and must be killed by contact. Nicotine sulphate is a good remedy for these and the addition of half a pound of an oily soap to each ten gallons of solution will make it more effective. Red spiders may be removed by a strong force of water against the underside of the leaves. The Black Spot causes much defoliation of roses. This disease is seen as spots on the leaves in early summer. The best known remedy for this is a mixture of flowers of sulphur, nine parts, arsenate of lead, one part. The sulphur should be fine. This mixture should be dusted on the plants as soon as they are in full foliage and before the Black Spot is noticed, repeating again several times at intervals of about ten days. This is effective against powdery mildew also. If spraying is begun early in the season there should be good foliage and abundant bloom.

RURAL PLANNING ADVISORS NAMED

Appointments to the Advisory Council of the Alberta Town and Rural Planning Board have been made by Order-in-Council as follows: C. L. Gibbs, M. L. A., Edmonton; H. M. E. Evans, Edmonton; P. Turner Bone, Calgary; H. E. G. H. Schofield, Calgary; Mrs. R. B. Gunn, Lloydminster; Mrs. Wellington Huyck, Strathmore and W. H. Fairfield, Lethbridge.

CARD OF THANKS

General Hospital, P. O. Box 7, Macleod, Alberta, June 6, 1929.

To the Editor
Macleod Times:
Mr. Editor—Sir:
We, the old people and incurables of this institution desire through your valuable paper to thank the Ladies of the Order of the Royal Purple, for their kindness extended to us in providing us with the good things handed to us on Wednesday, June 5th.

Sincerely,
George Dawson,
one of Them.
